Website: <https://www.islipsurgery.org.uk/>

Islip Medical Practice is based in a small village located 5 miles from Oxford and only 19 miles from the Horton Hospital at Banbury. We look after 5900 patients who live in the surrounding area, who provide us with lots of challenges, clinical and social dilemmas, but who also make the work here worthwhile.

The primary health care team consists of 7 GPs (female to male ratio 4:3!), 2 practice nurses, 2 health care assistants, a supportive practice manager and a full range of administrative staff. Health visitors are based in the building and are also involved in training. We pride ourselves on the standard of our clinical care and our commitment to teaching. Julie is the trainer at the practice, but all of the doctors share in tutorials, so that the registrar can benefit from their individual enthusiasm and expertise. Victoria has completed her educational supervisor training and is the prospective trainer for the practice.

We have been a training practice since 2004, when we moved into our present practice building. The registrar has their own room, and is fully involved in all aspects of the practice including partnership and business meetings. They are encouraged to develop their own engage in audit and formulary meetings, and very importantly share in coffee with the partners every morning!

The partners work hard, but also believe that a life outside the practice is essential to maintain sanity, so you may find them talking with enthusiasm about marathon cycle rides, musicals or the next family holiday.

In summary training at Islip aims to provide you with challenge and opportunity in a supportive and friendly environment. We look forward to meeting you!

Quotes from our past and present registrars (no bribery involved)

*"Islip is a fantastic practice and I feel incredibly lucky to be completing my training there."*

*"Islip is friendly and welcoming. The teaching and support I have received from all of the staff has been fantastic."*

*"My trainer is incredibly supportive and a wonderful teacher, I know I will be well prepared for life as a GP after a year in Islip."*
